TERMS OF SERVICE

- A. The Connecticut Oil Service Plan is only available to persons who purchase their entire year's fuel supply from the Company by way of automatic delivery. In the event that the Customer purchases oil from another oil company, stops doing business with Connecticut Oil, or if anyone other than Connecticut Oil Service technicians render service to the burner or heating equipment, Connecticut Oil will automatically terminate the Service Plan.
- B. Connecticut Oil reserves the right to terminate the Service Plan when payments for oil, service, or Service Plan are not made. Payment is due upon receipt of invoice.
- C. The Service Plan will automatically self-renew from year to year at a rate in effect at the time of said renewal unless either party gives 30 days prior written notice to the other party. The Service Plan does not cover the cost of labor or materials for damage when it is caused by electric service interruption, fire, flood, acts of God, water damage, tank leakage, frozen pipes, customer negligence, or circumstances beyond the control of the Company.
- D. Connecticut Oil will inspect and approve all existing heating equipment prior to acceptance in the Company's service plan. The Company is not responsible for, nor will the Company refund, any expenses that may have been incurred prior to the commencement of the Service Plan. Any pre-existing condition(s) must be remedied prior to commencement of coverage. The Service Plan is nonrefundable. Notwithstanding the above, the Service Plan is transferable to a new property owner in the event of a sale of the property.
- E. The Company is equipped to provide emergency service promptly. Telephone requests for service will be accepted 24 hours a day, and emergency service will be rendered with reasonable promptness.
- F. The Connecticut Oil service plan does not cover the cost of removing and replacing any materials relating to concealed pipes, ducts, oil lines, storage tanks or concealed heating systems.
- G. The Service Plan does not cover obsolete heating units, regular plumbing work, including but not limited to hot and cold water piping. The Company reserves the right to exclude from coverage any heating system which, in the Company's discretion, should be replaced and is not commonly used.
- H. The service plan is available to customers who purchase a minimum of 500 gallons of oil per season. No secondary heating systems are allowed. In the event that the Customer installs a wood stove, coal stove or portable heater, the Company reserves the right to terminate the Service Plan. Connecticut Oil reserves the right to repair or replace any part which, in the Company's sole discretion, the Company believes is necessary. The Company may substitute parts for others which are obsolete, unavailable or no longer manufactured.
- I. The Service Plan includes the cost of all labor to repair or replace parts as set forth in the respective plan. However, this plan does not cover the cost of labor due to Customer error, Customer's failure to reset the circuit breaker, replace fuse, set thermostat properly, turn on emergency switch, and no oil (unless on automatic delivery and account is current).
